

Lydia Seller of Purple Printable

1. Photocopy pages 2-3 back to back on white paper. You will need to make sure your printer is set to print as 'Landscape' on both sides of the paper, and to 'flip on long edge'. (NB: If you cannot print back to back you could still print both pages separately and stick together later).

2. Place the printable against a window with the cloak facing you. Trace around the outline of the edges of Lydia's headdress and feet. This will help you to cut out the template correctly without cutting pieces off by mistake.

3. Colour the template in on both sides. You may want to colour Lydia's cloak purple. Before you start make sure the colours you are using will not show through to the other side. Pencils or crayons may work better than felt-tips for this. Then cut the template out carefully.

4. Fold the sides inwards to show Lydia in her cloak.
